DAW'NER™

EDEMA REDUCER

ULTIMATE CARE NON-STOP

CLAIM TO FAME

- No pulling of scarred tissues.
- Guarantees proper gradient pressure time after time.
- Eliminates the need of nightly "rebandaging".
- Easy to use for arthritic hands.

HIGHLY RECOMMENDED DAWREDUCER™

The **DAW'NER** is the indispensable tool to apply the **DAW*REDUCER*** without disturbing the sensitive tissues of the new Amputee – By prestretching the Edema Reducer over the **DAW'NER**. The Residual Limb is introduced into the **DAW'NER** and the Edema Reducer softly slides into place without stretching or pulling the patient's tissues.

HOW TO ORDER

Stock #:

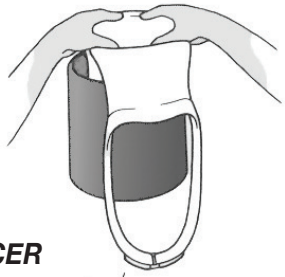
DAW'NER APPLICATION:

1

Insert **DAW*REDUCER*** inside **DAW'NER.**

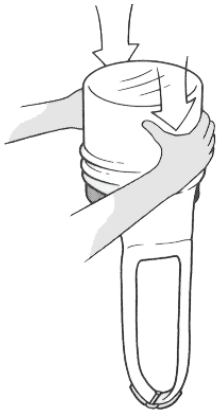


2

With both hands stretch **DAW*REDUCER*** over upper edge of **DAW'NER.**

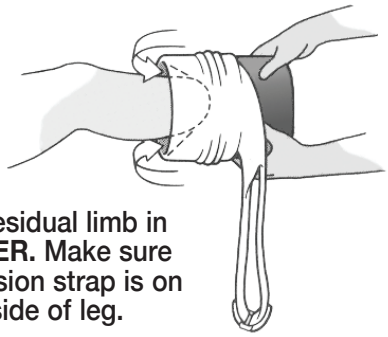
3

Pull **DAW*REDUCER*** down until the end is tight across top of **DAW'NER.**



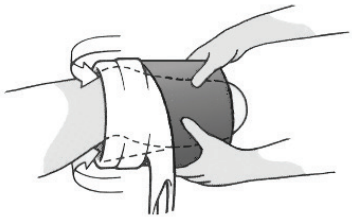
4

Place residual limb in **DAW'NER.** Make sure suspension strap is on lateral side of leg.



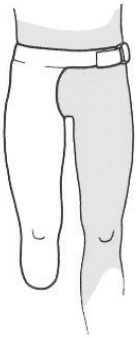
5

Pull **DAW'NER** upward allowing Edema Reducer to slide onto leg.



6

Remove **DAW'NER** and adjust suspension strap around waist.



ULTIMATE CARE – NON-STOP:

DAW is proud to provide you with the ultimate edema reduction system, designed specifically to prepare your limb for the best prosthetic care.

IMPORTANT: This DAW'NER and **DAW*REDUCER*** must be prescribed and fitted by a Certified Prosthetist.
