## SYMBOLEGEND™

- W = Width laying flat
- W1 = Width fully stretched
- L = Length laying flat
- L1 = Length when width is fully stretched
- E = Vertical shoulder dimension
- O = Neck opening

## Sanitized®. What does it mean?

Sanitized® products consist of approved combinations of different agents with high bacteriostatic and fungistatic action and a very good compatibility to mankind and the environment. Sanitized® prevents the microbes from absorbing nutrient from the surroundings (such as from perspiration, fibers...) and effectively inhibits the multiplication of bacteria and fungi. Due to the optimal fixation of Sanitized® to the finished product matrix, excellent fastness to washing and leaching is obtained. The antimicrobial action of Sanitized® products is guaranteed long-term.

THE BUILT-IN ANTIMICROBIAL PROTECTION  
 License #: 1038.98

Body-Jacket Interface is particularly susceptible to microbial attack. Soil and perspiration offer ideal living conditions for microbes. Bacteria and fungi on clothing textiles are not only non-hygienic, but may contribute to discoloration (yellow marks), felting and progressive decomposition of the material. Treatment with Sanitized® products ensures authentic, long term protection against unpleasant odors, preserves the material and provides hygienic freshness and greater wear comfort.
