

K3 Fearless™ Knee - Pediatric (TK-4P0C)

The Solution for the “Pediatric Weight Capacity Gap.”

Adjustable Variable Cadence Swing & a high weight limit make the K3 Fearless Knee especially well suited for Pre-teen Amputees who are ready to walk with a better gait but are not yet ready for a heavy adult knee.

Primary benefits:

- ✓ A weight limit of 132lbs allows your patient room to grow.
- ✓ 4-Bar function provides high stability in stance phase and reduces the chance of tripping in swing phase.
- ✓ DAW Pneumatics™ 2.0 allow for finer adjustment of heel rise and extension.
- ✓ Separate Extension / Flexion Adjustments as well as adjustable extension assist provide the practitioner exceptional control of swing phase function.

Suggested K3 L-Codes* **L5840** **L5850**
