PRINTABLE INSTRUCTIONS FOR DAW Stealth Application For Windows 7 and Firefox Browser

DAW Stealth Application - For Windows 7 and above

(Approximately 0.8 MB)

Step 1: Click on "Download Driver" button above and click on "Save File." This should open a window. If a window does not open click on the "Down Arrow" located in the top right of your Firefox browser and click on the file "mcp2221_windows_driver.zip."

Step 2: This will open up a window. Do not click on "mcp2221_windows_driver." Click on "Extract all files" located on the top left of that window. A new window will pop up. Click the "Show extracted files when complete" checkbox, then click "Extract" button on the bottom right of the window.

Step 3: Double click on "mcp2221_windows_drivers." Find the folder "Driver Installation Tool" and double-click to open it. Driver either comes in 32bit or 64bit depending on your operating system.

> To install 32bit Driver double-click folder "x86"

> To install 64bit Driver double-click folder "x64" and then double-click on

To find out if your PC is running 32bit or 64bit, click Start button, right-click My Computer, and then click Properties. Information can be found under System next to System type in the bottom half of the window.

Step 4: Double click on "McphCdcDriverInstallationTool."

Step 5: A window will pop up called "MCP2200 Driver Installation Tool." Click on "Next" and follow the steps to install.

Step 6: Click off (x) all windows except the daw-usa.com Stealth Downloads page.

(Approximately 167.3MB)

Step 7: Click on "Download Daw Stealth MPK Application" button above and click on "Save File." This should open a window. If a window does not open click on the "Down Arrow" located in the top right of your Firefox browser and click on the file "daw_application_installer.zip."

Step 8: This will open up a window. Do not click on "Daw Stealth Application Installer." Click on "Extract all files" located on the top righ of that window. A new window will pop up. Click the "Show extracted files when complete" checkbox, then click "Extract" button on the bottom right of the window.

Step 9: Double click on the "Daw Stealth Application Installer" file.

Step 10: Double click on the "set up" Application (and NOT the "setup" Configuration).

Step 11: Follow the prompts to install the Stealth Application.

Step 12: When complete, it is recommended you restart your computer.
